TEMPORARY FOOD ESTABLISHMENT

The term temporary food establishment applies to an establishment that operates at a fixed location for a period of time of not more than 14 consecutive days in conjunction with a single event or celebration.

Vendors who distribute only commercial pre-packaged, single-portioned, non-potentially hazardous foods do not need a permit.

3. All stands must have a suitable tight-fitting, water repellent roof or ceiling to provide for overhead protection of food preparation, cooking and serving areas.
4. Food at temporary events must be protected from contamination. Insect screening is one method of protecting food from contamination by insects. If screening is not used, some other suitable method of protection, such as containers, covers or wrappings must be used. If a vendor has a large selection of open foods that cannot be easily and safely covered or wrapped and will remain exposed for a length of time, screening may be the most practical way of protecting the food. If full walls and screening are not used, walls will be of sufficient height to exclude the public.
5. Adequate covered facilities for disposal of solid waste must be provided.

DISHWASHING:

6. Those stands that do not have hot and cold running water must provide the following:

HANDWASHING:

7. Soap, paper towels and a jug with a spigot that remains open to wash both hands shall be provided for hand washing. In addition, a bucket to catch waste water shall be provided.

FOOD PREPARATION:

8. All potentially hazardous food products must be stored at 41°F or colder or at 140°F or hotter. A metal stem product thermometer must be available at the stands that sell potentially hazardous foods.
9. Only single-serve items are to be provided for customer use.
10. All foods, food containers, utensils, napkins, beverage cups, straws and other single service materials must be stored at least six (6) inches above the floor and protected from splash, dust, insects, weather or other contamination.
